Program Features Similar to free programs such as Paint Shop Pro, Photoshop can be used to do basic editing, like cropping, resizing, and straightening images, but it is not for beginners. Advanced features such as layer manipulation, text editing, layers, masking, and non-destructive editing are available with more training. You can edit photos on either a single layer or an entire group of layers. Both types of editing are available on a single layer, allowing you to decide on what kind of edit you'd like to make, or when you are finishing your project, you can easily undo. Layers: This is the most important feature in Photoshop and is often used for editing the whole image. The original image has a single layer while the layers you add to the project have multiple layers. For example, you can add text and a photo on separate layers. Makeup: You can make a mask of objects in your image. This allows you to easily highlight or cover parts of a photo. You can also select, group, and ungroup layers to combine or split them. This can be helpful if you're making a picture of something, like a flower, and you want to highlight only the petals or the stem. Masking: You can mask the background of an image, which changes it's look and makes the other objects pop. This is especially helpful for making professional-looking pictures that can be used online. How to Work with Photoshop Basic Elements: If you're new to Photoshop, our guide to the basics of using Photoshop will get you started on a fast track to editing in the powerful program. Search The Transgender Path Unlike other womens' clothes, trans womens' clothes are often exotic, revealing and sometimes even frightening. While "transsexuals" are just a small part of the transgender population, trans womens' clothes can reveal a lot about a person. We do not discuss the physiology of gender, except to say that a large number of transgender people do not feel that they are in the correct body. The trans womens' style industry exists to cater to the demand for trans womens' clothes. An article on anonymous.com described a transgender friend as someone "who lives as a woman to express themselves as honestly as possible." The trans womens' style industry is quick to respond to this type of identity struggle and offer many inexpensive and unique trans womens' clothes to those who may not feel comfortable in traditional womens' clothing. A transgender woman who has "transitioned" is no longer a woman and must wear trans womens' clothes to express her true identity. People who do not share a similar gender identity to the one they were born with may also be compelled to wear trans womens' clothes. The world of gender identity includes cross dressers and drag queens, not transsexuals. In our feminist society, many women refuse to wear men's clothes and many men refuse to wear women's clothes. Many people will dress as the opposite sex to take part in the drag and comic performances, such as beauty pageants, whereas the majority of transsexuals will not participate in these events. Many transgender people do not undergo sex reassignment surgery, which is a term that describes the process of surgically altering one's

gender. Dr. Georg Jensen coined the term transsexual to describe people who do not feel like they fit in a “female” or “male” body and would like to use these sexed parts to achieve fulfillment. Many trans womens’ clothes are large, revealing, sexy and sometimes show off more than any designer ever imagined, but most still hide their true identity. A trans womens’ clothing style will not necessarily tell you that your friend is transgender. A transgender woman may wear women’s clothing and still be male. A transgender man may wear women’s clothing and still be male. His clothing, shoes, jewelry, makeup and hairstyle will tell you

Can you do your own home make-over? Alex West/*The Star-Ledger* How many times have you walked into a home and thought “I want to do that”? Well, it’s not always about being able to afford those high-end finishes and designer touches. In fact, we could all stand to use a little updating in our lives. Here’s the reality of it – most of the time, homeowners and renters can make changes in a rental home or for themselves, but can’t make too many too-major changes without causing massive monetary damage. Take the kitchen for instance. If someone messed with a kitchen that wasn’t suited for their family
